

Our Specialities

Occupational Health

Atlas Physical Therapy specializes in getting employees back to work as quickly as possible. Atlas has the privilege of being in-network with Pinnacol, which insures 2/3 of Colorado employers. This allows us to see most injured workers within 24 hours to get them back to work quickly. Atlas also performs Physical Ability Testing (PATs) and work hardening. The therapists incorporate manual therapy, massage, ultrasound, electric stimulation, and work simulation to get you back to work.
